

WBE'S NEW OFFERINGS!

COVID-19 SPREAD PREVENTION SOLUTIONS

As COVID-19 continues to change our lives and the ways in which we do business our number one concern is the health and safety of our employees and customers which has lead WBE to introducing our newest product offerings.

OUR NEWEST OFFERINGS INCLUDE:

UV DISINFECTION FIXTURE

The first known high intensity, full spectrum UV disinfection fixture to be installed in the ceiling, Helo fixtures provide unparalleled whole-room clinical level cleaning in any size space, along with the ability to disinfect 99.9 % of pathogens on demand in one cycle. The Helo F2 uses high intensity full spectrum UV, including germicidal UV-C, and anti-bacterial UV-B and UV-A to effectively kill bacteria, fungi, and viruses, and limit the growth of fungi on surfaces and in the air in a matter of minutes.

THERMAL CAMERAS

HOME WORKSTATIONS

Many institutions have begun to institute thermal imaging cameras as a pre-screening device. This device identifies elevated body temperature (EBT) which could be indicative of a fever (one of the symptoms of a viral infection).
